DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 1-2 are rejected under 35 U.S.C. 102(a) as being anticipated by the admitted prior art (Fig. 10 disclosed in pages 1-3 of the specification).

Regarding claim 1, the admitted prior art (Fig. 10 disclosed in pages 1-3 of the specification) discloses a recording apparatus (Fig. 10) of a video signal comprising:

a first recording means (the VTR 6 of Fig. 10, page 2, lines 3-13 and 27-28) for recording a digital video signal of a moving picture information on a first recording medium;

a second recording means (recording medium 7 of Fig. 10, page 2, lines 21-27) for recording a digital video signal of a still picture information on a second recording medium;

switch means for designating a preparation of recording said still picture information (switch 5 of Fig. 10 in still picture recording mode disclosed in page 2, lines 21-27); and

Art Unit: 2615

a display means (the viewfinder 8 of Fig. 10, page 2, lines 21-27, recording the still picture after confirming the still picture information to be recorded by the view finder 8 with switching the switch 5 over to the field memory 4) for displaying either one of said moving picture information and said still picture information or both of them after processing them for altering a picture size on one screen when said switch means is operated,

said recording apparatus records said still picture information to be recorded on the second recording medium after said still picture information is confirmed (recording the still picture information on the recording medium 7 after confirming the still picture information to be recorded by the view finder 8 with switching the switch 5 over to the field memory 4 disclosed in page 2, lines 21-27).

The method claim 2 is rejected for the same reasons as discussed in the corresponding apparatus claim 1 above.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The cited references relate to camera having still and moving modes.
